Marshalls' Indian Sandstone supplier Stone Shippers India recently donated a split-unit air conditioner to the children's operation theatre at Kota's Jaykaylon Hospital in India.

The hospital superintendent Dr Rawat had approached Stone Shippers with a request for an air conditioner as a replacement for their old non-functioning air conditioner was not expected this year.

The hospital caters for 60,000 patients every year, 10% of whom are children.

Mr Rajiv Bazaz from Stone Shippers said: *"I visited the hospital myself and I was shocked to see that this operation theatre for children was functioning without air conditioning. Summer temperatures in Kota are above 40°C!"*

As part of Stone Shippers' social activities in the community, the company donated a new air conditioning unit to the hospital in April 2010.
